

1.HTML BASICS

1. Understand the basics.html which was already created

```
<> basics.html X
1.HTML-BASICS > <> basics.html > ...
1  <!DOCTYPE html>
2  <html>
3      <head>
4      </head>
5  <body><h1>This is Heading!</h1>
6      <h2>This is Heading 2</h2>
7      <p> This is Paragraph</p>
8      </body>
9      </html>
```

2. Develop your own web page basics.html with all the following html tags
Html, head, title, body Heading, Paragraph, Italic, Bold, Anchor,
Unordered List, List Item, ,label,Blockquote, Horizontal rule, Image,
Division, Span.
AND
4. . Use pseudo classes and elements into your webpage

Navigation and pseudoclasses.html X

1.HTML-BASICS > Navigation and pseudoclasses.html > html > body

```
1  <!DOCTYPE html>
2  <html>
3  <head>
4      <title>My Favorite Travel Destination</title>
5      <style>
6          /* Pseudo-class: hover for links */
7          a:hover {
8              color: darkorange;
9              text-decoration: underline;
10         }
11
12         /* Pseudo-class: first-child to style the first item in the list */
13         ul li:first-child {

5. Pav Bhaji
6. Naan
7. Butter Chicken
8. Tiffins

Travel Tip

Tip:

Always carry cash as not all places accept cards.

1. CSS Basics

1. Add CSS comments in your CSS block.

```
<> comments.html X
1.CSS-BASICS > <> comments.html > body > h1
1  <!DOCTYPE html>
2  <head>
3  <link rel="stylesheet" href="/comments.css"/>
4  </head>
5  <body>
6  <p>This is a paragraph</p>
7  <h1>This is Heading</h1>
8  </body>
```

```
# comments.css X
1.CSS-BASICS > # comments.css > ...
1  /* This is a comment */
2  body{
3  background-color: chartreuse;
4  }
5  p,h1{
6  color: chocolate;
7  }
```

2. Create a page with different background-colour of a page and set an image as the background-image of a page (image should not scroll with the rest of the page and specify the size of a background image)

Hello

World

This is paragraph

1.CSS-BASICS > <> paragraph02.html > html

```
1 <!DOCTYPE html>
2 <html>
3 <head>
4   <link rel="stylesheet" href="/paragraph02.css">
5 </head>
6 <body>
7   <h1>Hello</h1>
8   <h2>World</h2>
9   <p>This is paragraph</p>
10  
11 </body>
12 </html>
```

1.CSS-BASICS > # paragraph02.css > h1

```
1 body{
2   background-color: pink;
3 }
4 h1{
5   color: blueviolet;
6 }
7
```

3.Create a different page with the width, style and color of the 4 border-style(set different borders on each side with different patterns)

```
1  <!DOCTYPE html>
2  <html>
3  <head>
4      <title>Different Border Styles</title>
5      <link rel="stylesheet" href="/borders.css"/>
6  </head>
7  <body>
8      <h2>Box with Different Borders</h2>
9
10     <div>
11         Box
12     </div>
13 </body>
14 </html>
15
```

```
1.CSS-BASICS > # borders.css > body
1  body{
2      background-color: pink;
3  }
4  h2{
5      text-align: center;
6  }
7  div{
8      width: 300px;
9      height: 200px;
10     margin: 50px auto;
11     padding: 20px;
12     text-align: center;
13     background-color: #f9f9f9;
14     border-left: 10px solid green;
15     border-bottom: 10px dashed yellow;
16     border-top: 10px dotted red;
17     border-right: 10px double lightblue;
18     color: rgb(104, 3, 198);
19 }
20
```

Box with Different Borders

4. Develop a page and set the height:(in pixels and %) and width:(in pixels and %) on elements.

```
<> box-dimensions.html X <> Differentfonts-05.html
1.CSS-BASICS > <> box-dimensions.html > html > body
1  <!DOCTYPE html>
2  <html>
3  <head>
4      <title>Height and Width Demo</title>
5      <style>
6          /* Box with fixed height and width in pixels */
7          .pixel-box {
8              width: 300px;
9              height: 150px;
10             background-color: lightcoral;
11             margin: 20px auto;
12             text-align: center;
13             line-height: 150px;
14             color: white;
15             font-weight: bold;
16         }
17
18         /* Box with height and width in percentage of parent */
19         .percent-box {
20             width: 80%;
21             height: 200px;
22             background-color: lightseagreen;
23             margin: 20px auto;
24             text-align: center;
25             line-height: 200px;
26             color: white;
27             font-weight: bold;
28         }
29     </style>
30 </head>
31 <body>
32     <h2>Box Dimensions Example</h2>
33     <div class="pixel-box">300px x 150px</div>
34     <div class="percent-box">80% width x 200px height</div>
35 </body>
36 </html>
```

```
18         /* Box with height and width in percentage of parent */
19         .percent-box {
20             width: 80%;
21             height: 200px;
22             background-color: lightseagreen;
23             margin: 20px auto;
24             text-align: center;
25             line-height: 200px;
26             color: white;
27             font-weight: bold;
28         }
29
30     body {
31         background-color: #f0f0f0;
32         padding: 20px;
33     }
34 </style>
35 </head>
36 <body>
37     <h2>Box Dimensions Example</h2>
38
39     <div class="pixel-box">300px x 150px</div>
40
41     <div class="percent-box">80% width x 200px height</div>
42 </body>
43 </html>
```

Box Dimensions Example

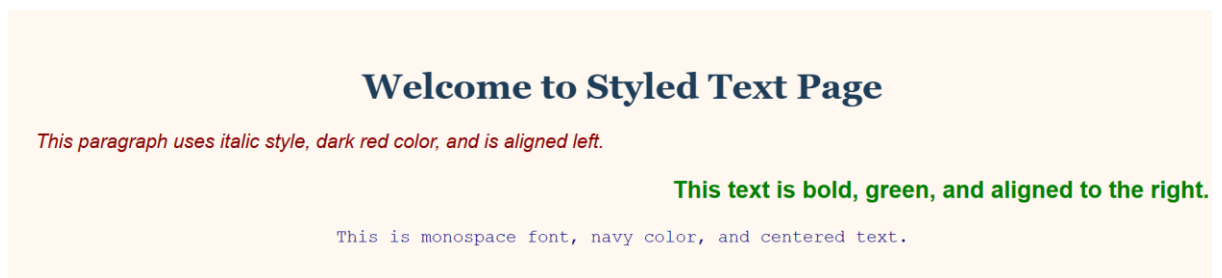

5. Develop a page with different font-styles, font-size, font-family, colors and text-align.

```
<> Differentfonts-05.html X
1.CSS-BASICS > <> Differentfonts-05.html > html > head > style > .fancy-text
1  <!DOCTYPE html>
2  <html>

12     <tr>
13       <td>Alice</td>
14       <td>24</td>
15     </tr>
16     <tr>
17       <td>Bob</td>
18       <td>30</td>
19     </tr>
20   </table>
21 </body>
22 </html>
23
```

```
<> Table.html X # table.css X
2. CSS Page Adjustments > # table.css > table
1  table {
2    border: 2px solid black;
3    width: 50%;
4    text-align: center;
5    transition: background-color 0.5s ease;
6  }
7
8  table:hover {
9    background-color: greenyellow;
10 }
11
```

2. Apply different visibility by an element (visibility: hidden, visible, collapse) and use different types of display for an element (display: none, inline, block, contents, list-item)

```
<> VisibilityandDisplay.html X # VisibilityandDisplay.css
2. CSS Page Adjustments > <> VisibilityandDisplay.html > ...
1  <!DOCTYPE html>
2  <html>
3  <head>
4  <link rel="stylesheet" href="VisibilityandDisplay.css">
5  </head>
6  <body>
7  <div class="visible">I am visible</div>
8  <div class="hidden">I am hidden</div>
9  <div class="collapse">I may collapse (works in table rows)</div>
10
11 <div class="none">Display: none</div>
12 <span class="inline">Display: inline</span>
13 <div class="block">Display: block</div>
14 <div class="contents"><p>This uses display: contents</p></div>
15 <li class="list-item">Display: list-item</li>
16 </body>
17 </html>
18
```

```
<> VisibilityandDisplay.html # VisibilityandDisplay.css X
2. CSS Page Adjustments > # VisibilityandDisplay.css > .visible
1  .visible {
2  visibility: visible;
3  }
4
5  .hidden {
6  visibility: hidden;
7  }
8
9  .collapse {
10 visibility: collapse;
11 }
12
13 /* Display properties */
14 .none {
15 display: none;
16 }
17
18 .inline {
19 display: inline;
20 background-color: yellow;
21 }
22
23 .block {
24 display: block;
25 background-color: lightblue;
26 }
27
28 .contents {
29
```

```
3  .contents {
4  display: contents;
5  background-color: pink;
6  }
7
8  .list-item {
9  display: list-item;
10 }
11
```

I am visible

Display: inline

Display: block

This uses display: contents

- Display: list-item

3. A long page which should have two links "click to go to bottom of page" and "click to go to top of page" . Also set their scroll-behavior to scroll smoothly.

```
2. CSS Page Adjustments > <> Smoothscroll.html > ...
1  <!DOCTYPE html>
2  <html>
3  <head>
4    <link rel="stylesheet" href="Smoothscroll.css">
5  </head>
6  <body>
7    <a href="#bottom">Click to go to bottom of page</a>
8
9    <div style="height: 1500px;"></div> <!-- Creates long scroll -->
10
11   <div id="bottom">
12     <a href="#top">Click to go to top of page</a>
13   </div>
14 </body>
15 </html>
16
```

```
2. CSS Page Adjustments > # Smoothscroll.css > html
1  html {
2    scroll-behavior: smooth;
3  }
4
```

[Click to go to bottom of page](#)

[Click to go to top of page](#)

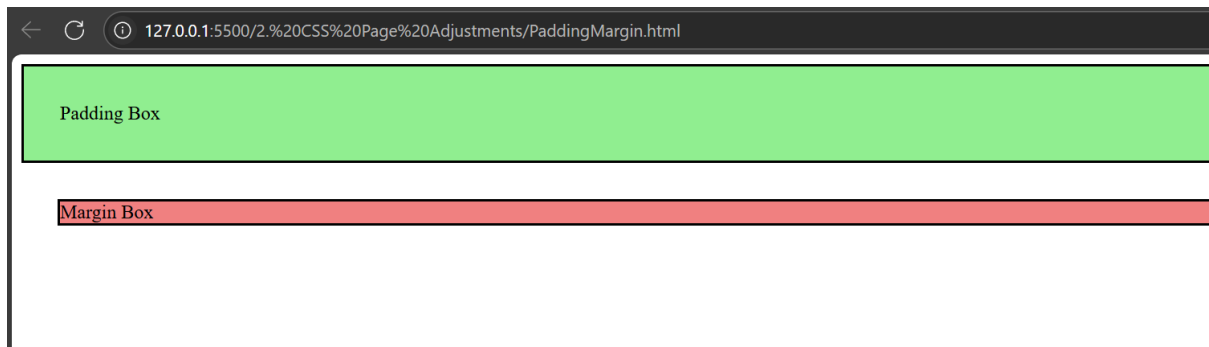

4. Add padding and margin with different size and understand the difference between them.

2. CSS Page Adjustments > <> PaddingMargin.html > ...

```
1  <!DOCTYPE html>
2  <html>
3  <head>
4  <link rel="stylesheet" href="PaddingMargin.css">
5  </head>
6  <body>
7  <div class="padding-box">Padding Box</div>
8  <div class="margin-box">Margin Box</div>
9  </body>
10 </html>
11
```

2. CSS Page Adjustments > # PaddingMargin.css > .padding-box

```
1  .padding-box {
2      background-color: lightgreen;
3      padding: 30px;
4      border: 2px solid black;
5  }
6
7  .margin-box {
8      background-color: lightcoral;
9      margin: 30px;
10     border: 2px solid black;
11 }
12
```

5.A page with multiple background images for an webpage or element and define their adjustable sizes.

```

<> multipleBackground.html X # multipleBackground.css
2. CSS Page Adjustments > <> multipleBackground.html > ...
1  <!DOCTYPE html>
2  <html>
3  <head>
4  <link rel="stylesheet" href="multipleBackground.css">
5  </head>
6  <body>
7  <div class="multi-bg">
8  This element has multiple background images.
9  </div>
10 </body>
11 </html>
12

```

```

1 .multi-bg {
2   width: 400px;
3   height: 300px;
4   padding: 20px;
5   color: white;
6   font-weight: bold;
7
8   background-image: url('https://via.placeholder.com/150/FF0000'),
9   url('https://via.placeholder.com/100/0000FF');
10
11   background-repeat: no-repeat, no-repeat;
12   background-position: left top, right bottom;
13   background-size: 150px 150px, 100px 100px;
14   background-color: gray;
15 }

```

3.Semantic Elements

1. Develop a web page with non-semantic elements div and span

```
1  <!DOCTYPE html>
2  <html>
3  <head>
4    <title>Non-Semantic Elements Example</title>
5    <style>
6      .header { background-color: lightblue; padding: 10px; }
7      .menu { background-color: lightgray; padding: 10px; }
8      .content { padding: 10px; }
9      .footer { background-color: lightblue; padding: 10px; }
10   </style>
11 </head>
12 <body>
13
14   <div class="header">
15     <span style="font-size: 24px;">My Website</span>
16   </div>
17
18   <div class="menu">
19     <span>Home</span> | <span>About</span> | <span>Contact</span>
20   </div>
21
22   <div class="content">
23     <span>Welcome to our website. This is the main content section.</span>
24   </div>
25
26   <div class="footer">
27     <span>© 2025 My Website</span>
28   </div>
```

```
  <div class="content">
    <span>Welcome to our website. This is the main content section.</span>
  </div>

  <div class="footer">
    <span>© 2025 My Website</span>
  </div>

</body>
</html>
```

47 </body>
48 </html>
49
50
```

3.CSS Effects

1. Apply CSS shadow effects like for image box and hover a cursor.

Name	Age
Alice	24
Bob	30

2. Use CSS animations (name,duration,iteration-count & delay) and paginations(Hoverable,with and without spaces).

```

<> Animations02.html X <> Positions03.html # style3.cs
3. CSS Effects > <> Animations02.html > ...
1  <!DOCTYPE html>
2  <html>
3  <head>
4  <link rel="stylesheet" href="style2.css">
5  </head>
6  <body>
7  <div class="animate-box">Animated Box</div>
8
9  <div class="pagination">
10 <a href="#">1</a>
11 <a href="#">2</a>
12 <a href="#">3</a>
13 </div>
14
15 <br>
16
17 <div class="pagination spaced">
18 <a href="#">1</a>
19 <a href="#">2</a>
20 <a href="#">3</a>
21 </div>
22 </body>
23 </html>
24

```

```

3. CSS Effects > # style2.css > ...
1  /* Animation */
2  @keyframes slideIn {
3  0% { transform: translateX(-100px); opacity: 0; }
4  100% { transform: translateX(0); opacity: 1; }
5  }
6
7  .animate-box {
8  width: 200px;
9  height: 100px;
10 background-color: lightblue;
11 animation-name: slideIn;
12 animation-duration: 2s;
13 animation-iteration-count: 2;
14 animation-delay: 1s;
15 margin-bottom: 20px;
16 }
17
18 /* Pagination (no space) */
19 .pagination a {
20 padding: 10px 15px;
21 background-color: lightgray;
22 text-decoration: none;
23 margin: 0;
24 border: 1px solid #ccc;
25 }
26
27 .pagination a:hover {
28 background-color: gray;
29 color: white;

```

3. Add positions to CSS block (static, relative, fixed, absolute and sticky).

```
<> Positions03.html X # style3.css
3. CSS Effects > <> Positions03.html > ...
1 <!DOCTYPE html>
2 <html>
3 <head>
4 <link rel="stylesheet" href="style3.css">
5 </head>
6 <body>
7 <div class="static-box">Static</div>
8 <div class="relative-box">Relative</div>
9 <div class="fixed-box">Fixed</div>
10 <div class="absolute-box">Absolute</div>
11 <div class="sticky-box">Sticky (Scroll down)</div>
12
13 <div style="height: 1000px;">Scroll Area</div>
14 </body>
15 </html>
16
```

```
1 .static-box {
2   position: static;
3   background-color: lightcoral;
4   padding: 10px;
5 }
6
7 .relative-box {
8   position: relative;
9   top: 10px;
10  left: 20px;
11  background-color: lightgreen;
12  padding: 10px;
13 }
14
15 .fixed-box {
16   position: fixed;
17   top: 0;
18   right: 0;
19   background-color: orange;
20   padding: 10px;
21 }
22
23 .absolute-box {
24   position: absolute;
25   top: 200px;
26   left: 100px;
27   background-color: skyblue;
28   padding: 10px;
29 }
```

4. Handling Overflow using scroll.

```
overflow04.html X # style4.css
3. CSS Effects > overflow04.html > ...
1 <!DOCTYPE html>
2 <html>
3 <head>
4 <link rel="stylesheet" href="style4.css">
5 </head>
6 <body>
7 <div class="scroll-box">
8   Lorem ipsum dolor sit amet, consectetur adipiscing elit. Sed non risus. Suspendisse lectus tortor,
9   dignissim sit amet, adipiscing nec, ultricies sed, dolor. Cras elementum ultrices diam.
10  Maecenas ligula massa, varius a, semper congue, euismod non, mi.
11 </div>
12 </body>
13 </html>
14
```

```
overflow04.html # style4.css X
3. CSS Effects > # style4.css > ...
1 .scroll-box {
2   width: 300px;
3   height: 100px;
4   border: 1px solid black;
5   overflow: scroll;
6   padding: 10px;
7 }
8
```

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Sed non risus. Suspendisse lectus tortor, dignissim sit amet, adipiscing nec, ultricies sed, dolor. Cras elementum ultrices diam. Maecenas ligula massa,

5. Adding Opacity to a image

```
3. CSS Effects > opacity05.html > html > body > img.transparent-img
1  <!DOCTYPE html>
2  <html>
3  <head>
4  <link rel="stylesheet" href="style5.css">
5  </head>
6  <body>
7  
8  </body>
9  </html>
10
```

```
<> opacity05.html # style5.css X
3. CSS Effects > # style5.css > ...
1  .transparent-img {
2  opacity: 0.6;
3  transition: opacity 0.3s;
4  }
5
6  .transparent-img:hover {
7  opacity: 1; /* Full visibility on hover */
8  }
9
```

4.CSS Compatibility

1. Create a table and apply table-layout as fixed and none

```
<> TableLayout01.html X # table.css
4.CSS Compatibility > <> TableLayout01.html > ...
1 <!-- table.html -->
2 <!DOCTYPE html>
3 <html lang="en">
4 <head>
5   <meta charset="UTF-8">
6   <title>Table Layout</title>
7   <link rel="stylesheet" href="table.css">
8 </head>
9 <body>
10  <h2>Table Layout: Fixed</h2>
11  <table class="fixed-layout">
12    <tr><th>Name</th><th>Age</th><th>City</th></tr>
13    <tr><td>John</td><td>25</td><td>New York</td></tr>
14    <tr><td>Alice</td><td>30</td><td>Los Angeles</td></tr>
15  </table>
16
17  <h2>Table Layout: Auto (None)</h2>
18  <table class="auto-layout">
19    <tr><th>Name</th><th>Age</th><th>City</th></tr>
20    <tr><td>Jonathan Doe</td><td>25</td><td>New York City</td></tr>
21    <tr><td>Alice Smith</td><td>30</td><td>Los Angeles</td></tr>
22  </table>
23 </body>
24 </html>
25
```

```
<> TableLayout01.html # table.css X
4.CSS Compatibility > # table.css > ...
1 /* table.css */
2 table {
3   width: 100%;
4   border-collapse: collapse;
5   margin-bottom: 20px;
6 }
7 th, td {
8   border: 1px solid #444;
9   padding: 8px;
10  text-align: left;
11 }
12 .fixed-layout {
13   table-layout: fixed;
14 }
15 .auto-layout {
16   table-layout: auto;
17 }
18
```

Table Layout: Fixed

Name	Age	City
John	25	New York
Alice	30	Los Angeles

Table Layout: Auto (None)

Name	Age	City
Jonathan Doe	25	New York City
Alice Smith	30	Los Angeles

2. Create a list and change its list-style-type

```
<> Listtype02.html X # list.css
4.CSS Compatibility > <> Listtype02.html > ...
1 |<!-- list.html -->
2 |<!DOCTYPE html>
3 |<html lang="en">
4 |<head>
5 |   <meta charset="UTF-8">
6 |   <title>List Style</title>
7 |   <link rel="stylesheet" href="list.css">
8 | </head>
9 | <body>
10 |   <h2>Custom List Styles</h2>
11 |   <ul class="circle-list">
12 |     <li>HTML</li>
13 |     <li>CSS</li>
14 |     <li>JavaScript</li>
15 |   </ul>
16 |   <ol class="roman-list">
17 |     <li>Step One</li>
18 |     <li>Step Two</li>
19 |     <li>Step Three</li>
20 |   </ol>
21 | </body>
22 | </html>
23 |
24 |
```

```
<> Listtype02.html # list.css X
4.CSS Compatibility > # list.css > ...
1 |/* list.css */
2 |.circle-list {
3 |  list-style-type: circle;
4 |}
5 |
6 |.roman-list {
7 |  list-style-type: upper-roman;
8 |}
9 |
```

Custom List Styles

- HTML
 - CSS
 - JavaScript
- I. Step One
 - II. Step Two
 - III. Step Three

3. Create a grid with of different types

```
<> Grid03.html X # grid.css
4.CSS Compatibility > <> Grid03.html > ...
1 <!-- grid.html -->
2 <!DOCTYPE html>
3 <html lang="en">
4 <head>
5   <meta charset="UTF-8">
6   <title>CSS Grid Example</title>
7   <link rel="stylesheet" href="grid.css">
8 </head>
9 <body>
10   <h2>CSS Grid Layout</h2>
11   <div class="grid-container">
12     <div class="item">1</div>
13     <div class="item">2</div>
14     <div class="item">3</div>
15     <div class="item">4</div>
16     <div class="item">5</div>
17     <div class="item">6</div>
18   </div>
19 </body>
20 </html>
21
```

```
<> Grid03.html # grid.css X
4.CSS Compatibility > # grid.css > ...
1 /* grid.css */
2 .grid-container {
3   display: grid;
4   grid-template-columns: 1fr 1fr 1fr; /* 3 equal columns */
5   gap: 10px;
6   padding: 20px;
7 }
8
9 .item {
10   background-color: #4CAF50;
11   color: white;
12   padding: 20px;
13   text-align: center;
14   font-size: 20px;
15 }
16
```

CSS Grid Layout

1	2	3
4	5	6

4. Create a hero image

```
<> hero04.html X # hero.css
4.CSS Compatibility > <> hero04.html > ...
1  |<!-- hero.html -->
2  |<!DOCTYPE html>
3  |<html lang="en">
4  |<head>
5  |   <meta charset="UTF-8">
6  |   <title>Hero Image</title>
7  |   <link rel="stylesheet" href="hero.css">
8  |</head>
9  |<body>
10 |   <div class="hero-image">
11 |     <div class="hero-text">
12 |       <h1>Welcome to My Website</h1>
13 |       <p>Your success begins here.</p>
14 |     </div>
15 |   </div>
16 |</body>
17 |</html>
18
```

```
4.CSS Compatibility > # hero.css > .hero-text
1  /* hero.css */
2  .hero-image {
3  |   background-image: url('https://vignette2.wikia.nocookie.net/sonicpokemon/images/7/77/Pikachu.png/revision/latest?cb=20120603213349'); /* Replace with your image */
4  |   height: 100vh;
5  |   background-position: center;
6  |   background-repeat: no-repeat;
7  |   background-size: cover;
8  |   position: relative;
9  | }
10
11 .hero-text {
12 |   text-align: center;
13 |   position: absolute;
14 |   top: 50%;
15 |   left: 50%;
16 |   transform: translate(-50%, -50%);
17 |   color: white;
18 | }
19
```

5. Write a program of view-port for grid, media queries, image and video.

```
1  <!-- responsive.html -->
2  <!DOCTYPE html>
3  <html lang="en">
4  <head>
5      <meta charset="UTF-8">
6      <title>Responsive Design</title>
7      <meta name="viewport" content="width=device-width, initial-scale=1.0">
8      <link rel="stylesheet" href="responsive.css">
9  </head>
10 <body>
11     <div class="responsive-grid">
12         
15         <video controls class="responsive-video">
16             <source src="sample.mp4" type="video/mp4">
17             Your browser does not support the video tag.
18         </video>
19     </div>
20 </body>
</html>
```

```
# responsive.css X <> Viewport05.html
4.CSS Compatibility > # responsive.css > ...
1  /* responsive.css */
2  body {
3      margin: 0;
4      font-family: Arial, sans-serif;
5  }
6
7  .responsive-grid {
8      display: grid;
9      grid-template-columns: 1fr 1fr;
10     gap: 20px;
11     padding: 20px;
12 }
13
